- Surface discoloration, fading, or chalking due to normal exposure to sunlight, air pollutants, and atmospheric conditions is considered a natural occurrence and is excluded from coverage.
- Storm doors installed in front of entry doors, which may cause heat buildup resulting in warped door panels and deformation of PVC and/or composite materials, are not covered under this warranty.

- Issues resulting from improper handling or faulty installation are excluded.
- Issues related to settlement or structural defects of the building are excluded.
- Bowed steel slabs exceeding 3/16 inch, if not measured with a properly installed frame to obtain an accurate measurement, shall not be covered.
- Internal condensation—which may occur when internal humidity levels are excessively high relative to the difference between exterior and interior temperatures—is not warranted.
- Glass breakage is excluded from this warranty.
- If the product has been altered, modified, or exposed to harmful chemicals or pollutants, such alterations or exposures shall void this warranty. It is recommended that cleaning be performed using water, a mild household soap, and a soft sponge.

All damage claims must be submitted by the Standard Doors Inc. dealer within one week of installation to be considered valid.
